PROFESSIONAL SUMMARY

Senior Software Developer with 5+ years of experience building scalable web applications and RESTful APIs. Proficient in PHP, Laravel, JavaScript, React.js, MySQL, and Git. Experienced in full-stack development, role-based access control, CRM systems, HR management platforms, and membership and donation platforms with online payments. Proven ability to collaborate with cross-functional teams and deliver quality solutions aligned with business requirements.

TECHNICAL SKILLS

Languages: PHP, JavaScript, HTML5, CSS3

Frameworks & Libraries: Laravel, Livewire, React.js, Next.js, jQuery, Bootstrap

Database: MySQL

Tools & Practices: Git, GitHub, REST API Development, Payment Gateway Integration, Front-End & Back-End Integration, Agile/Scrum

WORK EXPERIENCE

Senior Software Developer | Datagrid Solutions | Mumbai — Jun 2026 – Present

- Developing the platform for the Jain Society of Greater Atlanta (JSGA), covering membership, donations and community management, using Laravel 11 and MySQL.
- Built the membership renewal flow with online payment, member IDs and linked family members.
- Built donation modules for multiple funds (scholarship, general fund, Jeev Daya, Gautam Nidhi), with donation tracking, invoices and a donation dashboard.
- Developed proforma invoicing for members and non-members, with payment settlement and proforma reports.
- Delivered Gallery (photos and videos), Virtual Darshan (live video), Obituary and Snatra Samagri request forms with email notifications, Feedback and Committee modules, with labels managed through language files.
- Added “Scan to Donate” QR codes for each donation fund, and role-based access for donation tracking and gallery management.

PHP Laravel Developer | Bynaric Systems Private Limited | Mumbai — Jun 2025 – Mar 2026

- Designed and developed a comprehensive Inspection Management System using Laravel and MySQL, digitizing the entire inspection workflow.
- Implemented role-based access control (RBAC) to manage Admin and Inspector privileges.
- Built modules for inspection creation, assignment, tracking, and reporting with real-time progress visibility.
- Reduced manual reporting efforts significantly by centralizing inspection data.

PHP Laravel Developer | Core Ocean Solution LLP | Mumbai — Jun 2023 – Feb 2025

- Led development of the Budget Control Register (BCR) accounting system for Panvel Municipal Corporation, managing its budgetary workflows.
- Streamlined tracking of work orders and bills within designated budgets.
- Participated in client meetings to align software features with business requirements.

PHP Developer | Fintoo (Financial Hospital Advisor LLP) | Mumbai — Sep 2022 – May 2023

- Designed and maintained a CRM tool for managing financial and stock advisory services.
- Collaborated with cross-functional teams to integrate back-end logic with front-end interfaces.
- Improved efficiency of financial advisory workflows through user-friendly application design.

PHP Laravel Developer | Infoz Software Solution | Mumbai — Oct 2020 – Sep 2022

- Developed HR Management System automating employee lifecycle and payroll processes using Laravel.
- Built Diskcovero, a platform for efficient disk management.
- Developed SpeakWell English Academy, an application supporting English learning programs.
- Gained foundational experience in PHP development, database management, and version control.

KEY PROJECTS

JSGA – Jain Society of Greater Atlanta
Laravel platform for a US-based Jain community organization covering membership renewals, donations, proforma invoicing and community services, with online payments through Square, PayPal and Razorpay.

BCR System – Panvel Municipal Corporation
Budget control and accounting system for Panvel Municipal Corporation, enabling streamlined work order and bill tracking within budgets.

Financial CRM
Comprehensive financial advisory CRM supporting diverse client needs, with back-end and front-end integration for financial and stock advisory services.

Inspection Management System
End-to-end inspection workflow platform with RBAC, real-time tracking, and centralized data management using Laravel and MySQL.

HR Management System
Laravel-based HR platform automating employee lifecycle, payroll, and operational HR processes.
